

## **Jet Fountain** KAT T1 -Indoor - CE 1008 -T1-69261389 -**FOUNTAIN-**

### **Instruction manual:**

Required safety distance from persons, animals and objects:

Radial: 2 m in the direction of effect: 7 m

The objects may only be used for technical purposes in the context of stage, film and photo productions as well as music and show events. The object may only be distributed and passed on in its unopened original packaging. Minimum age in accordance with Directive 2013/29/EU or national regulations. Distribution to persons under the age of 18 is prohibited. (In Germany) You may only use our fountains if you comply with the rules of technology and all relevant laws and regulations (in Germany in particular SprengG, 1. SprengV, 2013/29/EU and SprengTR 100). This includes, in particular, the prohibition of smoking and naked flames during handling and the provision of suitable fire extinguishing equipment.

We would also like to draw your attention to compliance with the Assembly Centre Ordinance of your country. Stadiums and open-air stages can be places of assembly.

Avoid obstructions above the rigging! Do not hold any part of your body over the nozzle!

Secure the object in a suitable holder (frame or stand) and place it on firm, level ground so that the object cannot tip over.

**NEVER NAIL OR CRUSH THE JET FOUNTAIN!**

Connect to a suitable ignition device only when it is de-energised! A DC current of 0.6 A for single ignition and 0.8 A for series ignition is required for ignition. The test current must not exceed 25 mA. Maximum 110 V safety extra-low voltage.

Ignites without delay when the ignition voltage is applied with a directed discharge of its pyrotechnic charge (spark). pyrotechnic charge (Sparks).

Can only be ignited if there is an unobstructed view of the ignition point and the safety measures are observed.

Ignition/use is possible and permitted at any angle, including overhead. Please note that the safety distance in the direction of action also applies here, e.g. when mounted horizontally.

The jets are fired from below. This means that the sparks come from the side opposite the wire. side opposite the wire. Note the printed arrow!

Store in a cool, dry and tightly closed place. Keep out of the reach of minors. Observe storage regulations according to national regulations.

Qualified persons with a certificate of competence may use the articles in a manner that differs substantially from the manner described here. However, the dangers and risks associated with such use must be taken into account.

If the product does not function properly, it must be disposed of properly or returned to the supplier. returned to the supplier.
